

Matteo Politi is an independent researcher and health practitioner, and serves as Head of Research and Development at Takiwasi Center, a therapeutic community dedicated to addiction rehabilitation and research on traditional medicines in Peru. He holds a degree in Pharmaceutical Chemistry and a PhD in Natural Products, with advanced specialization in Naturopathy and Phytotherapy. His professional background spans both the public and private sectors, including for-profit and non-profit organizations.

He has conducted scientific research in advanced laboratory settings, including at the Joint Research Centre of the European Commission, and has carried out ethnobotanical fieldwork in diverse cultural contexts. He is the author of scientific papers (h-index 21 - Scopus database), educational publications, and conference presentations.

His experience includes teaching at public universities and private schools, facilitating workshops and experiential learning programs, and providing private consultations in the field of natural health.

Extensive experience in deep ecology has profoundly shaped his personal and professional development, fostering an integrated perspective that bridges traditional medical systems, ethnobotany, and planetary health.
